

1-27-22

HPX – PMC meeting notes

Present:

Mikael, Hartmut, John, Gregor, Auriane, Giannis, Nikunj

Cdash problems fixed

HPX dashboards should be up and running tomorrow

Mikael will keep maintaining the HPX spack package

John updated on the parcelport. It's working and been upgraded and ready to be tested.

Kokos/HPX discussion

HPX Release – mid-March

HPX Course – discussion about whether or not to participate. Can interest be gauged prior to committing? Include Pika? Make a decision at the next meeting.

PMC – meetings will continue. Should there be changes to the committee. If so, CSCS seats – 1 or both available? For now, keep as is. See if things change moving forward.

GSoC

Mid February is the deadline for organization applications

More projects are needed. Add to the GSoC wiki page

All projects should be under the STE|AR group umbrella, not necessarily HPX
